Application for Services

Name of Owner/ Developer: _____

Mailing Address: _____

Physical Address of Property: _____

Assessor Number: _____ Proposed Development: _____

Applying For: Water Sewer
Service Connection:
Main Extension:

When submitting this application, you will need at minimum provide the following:

Site Plan, If Subdivision - Number of Lots, Type of Business, If Business - Number of Employees,
Expected Flows, Demolition of current structures served on property(s),

The Following approvals will also be required prior to District approval:

Zoning and floodplain review by Flathead County Planning and Zoning Office is required for all services. The Planning and Zoning Office is located on the 2nd floor of the South Campus Building, 40 11th Street W.

Request for sewer service to areas located outside the District Sewer Service Boundary must get written approval from the City of Kalispell.

Work to be performed along highways will require MTDOT encroachment or occupancy permits prior to construction. It could take up to 60 days to obtain permits from MTDOT.

Payment to City of Kalispell for Sewer Treatment Fee must be paid before services will be put in service. Invoice from City of Kalispell must be presented to District.

Request for services will be considered by the District once approval is received from the above agencies and returned with this application. Approval of plans by the District could take up to 60 days.

Additional Requirements

Water services will require a backflow device in the form of an approved double check valve assembly, or a reduced pressure valve (RP). The type of backflow device required will be determined by the District.

An appropriate backflow device will be installed on all fire suppression systems. The type of backflow device required will be determined by the District.

The Fire Department providing services to an area will determine the need for a fire system, flows required for fire suppression, number and location of fire hydrants. This information will be provided in writing to the District in writing prior consideration.

[All applicable charges and fees will be paid to the District prior to construction](#)

All water and sewer installations will be inspected by District personnel prior to burial. Failure to have installations inspected will result in re-excavation and/or disapproval of the installations. Inspections will be performed during District working hours and it could take up to 24 hours for inspections to occur.

Other requirements and specifications are provided in the District Water & Sewer Specifications and Conditions for Main Extensions.

Questions regarding use of materials, devices, etc. not covered in the specifications will be considered by the District.

Flathead County Planning & Zoning

Water services will require a pressure reduction valve (PRV). If a backflow device is required, the type of device required will be determined by the District.

An appropriate backflow device will be installed on all fire suppression systems. The type of backflow device required will be determined by the District. The Fire Department providing services to an area will determine the need for a fire system, flows required for fire suppression, number and location of fire hydrants. This information will be provided in writing to the District in writing prior to consideration.

All applicable charges and fees will be paid to the District prior to construction.

All water and sewer installations will be inspected by District personnel prior to burial. Failure to have installations inspected will result in re-excavation and/or disapproval of the installations. Inspections will be performed during District working hours and could take up to 24 hours for inspections to occur.

Other requirements and specifications are provided in the District Water & Sewer Design Specifications. Questions regarding use of materials, devices, etc. not covered in the specifications will be considered by the District.
